Dear Jim:

By now you are probably winging your way to warmth and light. What fun it was to see you and be able to work with you for such an extended period. Enclosed is a transcript of the first tape we made together here in Kalamazoo. Typically, the tape has raised more questions in my mind, so here goes:

1. You mention using your soul body to travel in the astral. Describe the astral body, the soul body and the mental body please. In other words, how can we make a layman understand these?
2. You mention that there are seven universes. Would you please describe these.
3. pp. 17-18: You were speaking of the different creations. Did any of the creations skip Kaal? In other words are there any that were, as far as time and space are concerned, closer to true God-like creations? What happened to these creations?
4. p. 20: Stalin didn't do it as a mystic "but as a physical being with physical desires." I think you say that you are a mystic. Does this mean that you are not a physical being with physical desires? What about Hitler? Maybe what I want you to do here is define the word, mystic. My dictionary says: ^{ADJECTIVE} 1. Of or pertaining to the religious mysteries of Greece and Rome or to other occult rites and practices. 2. Mysteriously symbolic; inspiring a sense of mystery and wonder. 3. Mystical (Noun): One who practices or believes in mysticism or a specified form of mysticism. (In Greek the word mustes meant an initiated person. See mystery (secret).

5. p. 26: soul mates - eventually they do come together in perfect harmony and reach spiritual perfection together. Would you please explain that further. Do you know yours in this lifetime?
6. Jesus and Mary Magdeline - David and Bathsheba, etc. Jesus was a living saint: the word of God incarnate. Was Mary Magdeline? How about David and Bathsheba? If Jesus was different, the living word of God, a living saint, etc., why did he have to go through the evolutionary process - many, many lives?
7. p. 27: If we had conquered the emotional and the mental pretty much on Sirius and Sirius is a part of the physical universe, why did we have to go through the evolutionary process again here?
8. Since Sirius is part of the physical universe, is that experience going on right now also? The infamous time - space question again.
9. What do you remember about Sirius? How was life there different from here? Was the evolutionary process different there?
10. ^{p. 29} In the physical universe or universes, where are there more evolved life forms or energies? Stars, planets, etc.? Are there still living beings on Sirius? At what stage of development?
11. ^{p. 29} The ultimate is to let go of the emotional and mental. How would I be able to do my job if I let go of the mental - maybe I don't understand what you mean of let go. Or is that way down the evolutionary path and now is the time to deal with letting go of the emotional? And if the highest truth is love, how can that be expressed without the emotional in some sense?

Aren't you glad I wrote?

12. p. 31: Masters or living saints: Where ever you confront them, they are just light. What if I were to see a living saint? What would I see? Is it only the "seers" who see light or would everybody?
13. The four lives that a living saint says you have to live before liberation: Do they have to be consecutive? Jesus was a living saint and you were his disciple. And now you have one. Did you have one as Anthony of Padua, as John of Avila, etc.? As Gandhi? Please go into a great deal of detail on this.
14. I was going to ask this one later, but it really peaks my curiosity - What is Bobby Kennedy doing on Mars? Who else is there? Your friend in Texas had agreed to do so many years service there....Do these folks have to start all over in the evolutionary process of Mars?
15. Is Thomas Jefferson important. Do we know that particular soul? How about Robert E. Lee?

The 33 pages I'm sending you today are partially answers to questions raised by the tape that you sent me. I am also copying that to send to you as I didn't copy enough to give you one while you were here. So I guess that should go in your book first. Once again, I loved seeing you and working with you - maybe someday I won't ask such weird questions all the time. Maybe someday I'll see the light! Send us some sunshine.

Love you,
Kaye
